dikshanya@Dikshanya:~/Desktop/8th_Semester/DD/Lab$ xinput remove-master 15
dikshanya@Dikshanya:~/Desktop/8th_Semester/DD/Lab$
```

Unable to show the cursors during the screenshot.

Above commands used

1. Xinput: to print the current set of pointers and keyboards
2. Xinput create-master point2 - makes a new pointer of the name point2(at id=15)
3. Xinput remove-master 15 - removes the pointer at 15 (the id at which new pointer was created)
